

Ras Al Khaimah International Airport expansion has VideoSphere technology

A leading provider of intelligent IP video and business analysis applications announced today that Ras Al Khaimah (RAK) International Airport has invested in the VideoSphere intelligent video management solution to enhance passenger and asset security in its main terminal and adjacent facilities.

Ras Al Khaimah International Airport serves 27 airlines and is in the midst of a \$16 million renovation and expansion project, which includes two new terminals, a VIP lounge, automated passenger and baggage handling facilities, and a cargo collection centre.

"The VideoSphere solution provides Ras Al Khaimah airport with world-class surveillance capabilities in keeping with its new, state-of-the-art passenger and cargo services," said Basel Al Aref, General Manager of the Professional Projects Division of Oasis Enterprises.
